

Application. No. 10/668,805
Amendment dated February 15, 2008
Reply to Office Action of December 6, 2007

Amendments to the Claims:

This listing of claims replaces all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1 - 28 (cancelled)

Claim 29 (previously amended): A method for drilling and cutting to prepare an osteotomy in a jawbone, comprising the steps of:

a) using a cutting and drilling blade with an osteotomy locator tip of a multifunctional dental surgical tool to precisely locate an osseous implant site and prevent wandering and slipping of said tip to perform crestal bone marking;

b) using a redirectable tip of said cutting and drilling blade to avoid bone and tissue anatomical vital sites in a patient's jawbone;

c) using a crestal bone height reducer operatively formed from said cutting and drilling blade, to create a leveled implant osseous platform by moving said cutting and drilling blade in a buccal-lingual, nonlinear motion;

d) using said crestal bone height reducer to harvest bony particulate material;

e) using a tapered countersink of said multifunctional dental surgical tool to create a counterbore in cortical bone of said jawbone;

f) using a gross osseous crestal bone height reducer of said multifunctional dental surgical tool to harvest bony particulate materials;

Amendment dated February 15, 2008
Reply to Office Action of December 6, 2007

g) using an osteocompressor operatively connected to said gross osseous crestal bone height reducer to compress the osseous site, completing the preparation of said osteotomy in said jawbone; and

h) using a synthetic bone graft material mixed with said bony particulate material to reconstruct bone structures.
